SUMMARY

MERN Stack Developer with hands-on experience in building and deploying scalable full-stack applications. Skilled in React.js, Node.js, Express.js, MongoDB, and PostgreSQL, along with practical DevOps experience using AWS services (EC2, S3, CloudFront, ECR), Docker, Nginx, and CI/CD pipelines. Also worked in React-Native/Flutter for Android app development and solving DSA problems on LeetCode.

EDUCATION

University of Education

Bachelor of Science in Computer Science

Township, Lahore

2023 – 2027

Shalimar Graduate College

Intermediate in Computer Science (ICS)

Lahore

2021 – 2023

PROJECTS

Multivendor E-Commerce Platform | MERN, AWS, Docker, CI/CD

- Developed a large-scale multivendor platform with product management, order tracking, and secure payment integration.
- Implemented an admin panel for vendor and user management.
- Containerized backend using Docker and deployed on AWS ECS with images stored in Amazon ECR.
- Deployed frontend on Amazon S3 with CloudFront CDN for global content delivery and caching optimization.
- Implemented CI/CD pipelines using GitHub Actions for automated build, deployment, and CloudFront cache invalidation.

E-Token Management System | Next.js, React Native (Expo), Socket.IO, Node.js, MongoDB

- Designed and developed a digital patient queue management system after observing inefficient token handling and crowd management in local medical clinics.
- Built a public portal for token registration and live queue tracking using Next.js and MongoDB.
- Developed a doctor dashboard in React Native (Expo) for managing patient queues and updating consultation status.
- Implemented real-time queue updates across devices using Socket.IO, eliminating manual page refreshes.
- Designed RESTful APIs with Express.js and MongoDB for patient registration, token generation, and queue management.

Learning Management System (LMS) Mobile App | React Native, Expo, Node.js

- Developed a Learning Management System mobile application using React Native with Expo.
- Implemented notification functionality using Firebase Cloud Messaging FCM with expo.
- Designed REST API integration for handling course content and user progress.
- Focused on cross-platform mobile architecture and scalable UI components.

School Management System | MERN with TypeScript, PostgreSQL

- Built a school management system handling students, teachers, attendance, and courses.
- Used PostgreSQL for relational data modeling and TypeScript for strong typing.

E-Commerce Mobile App | Flutter, Firebase

- Built a Flutter-based Android app with Firebase Authentication and Firestore.
- Implemented product CRUD operations, cart management, and integrated Provider for state management.

TECHNICAL SKILLS

Languages: JavaScript, C/C++, TypeScript

Frameworks/Libraries: NextJs, ReactJS, React-Native, Flutter

Databases: MongoDB, PostgreSQL, Firebase Firestore

Operating Systems: Linux, Windows
